Help/Tips]

The following characters have specialized meaning:

Special Characters	Description
,()[These characters end a text token.
	These characters end a text token because they signify the start of a field operator. (! is special: != ends a token.)
	These characters signify the start of a delimited token. These are terminated by the end character associated with the start character.

4 ◀	The potential of artificial intelligence to help solve the crisis in our legal system	80%

Donald H. Berman , Carole D. Hafner Communications of the ACM August 1989 Volume 32 Issue 8

The laws that govern affluent clients and large institutions are numerous, intricate and applied by highly sophisticated practitioners. In this section of society, rules proliferate, lawsuits abound, and the cost of legal services grows much faster than the cost of living. For the bulk of the population, however, the situation is very different. Access to the courts may be open in principle. In practice, however, most people find their legal rights severely compromised by the cost of legal ...

5 Parallel execution of prolog programs: a survey

80%

Gopal Gupta, Enrico Pontelli, Khayri A.M. Ali, Mats Carlsson, Manuel V. Hermenegildo

ACM Transactions on Programming Languages and Systems (TOPLAS) July 2001

Volume 23 Issue 4

Since the early days of logic programming, researchers in the field realized the potential for exploitation of parallelism present in the execution of logic programs. Their high-level nature, the presence of nondeterminism, and their referential transparency, among other characteristics, make logic programs interesting candidates for obtaining speedups through parallel execution. At the same time, the fact that the typical applications of logic programming frequently involve irregular computatio ...

6 Image analysis and enhancement using fuzzy rule based expert 80% d system Ali Asqharzadeh

Proceedings of the 1996 ACM symposium on Applied Computing February 1996

Expert system applications in customer service

80%

Stephen Schon, Omar Keith Helferich Proceedings of the conference on The 1987 ACM SIGBDP-SIGCPR Conference March 1987

The competitive edge of using expert system technology is beginning to have an impact on the marketplace. Described here are applications of expert system technology to customer service and many of the ideas presented here are applicable to other areas of business as well. This project was accomplished in cooperation with the Customer Service Department of a major U.S. chemical company, and this paper describes the design, implementation, and results of a diagnostic expert system prototype ...

The Credit Act Advisory System (CAAS): conversion from an expert system prototype to a C++ commercial system George Vossos, John Zeleznikow, Allan Moore, Dan Hunter Proceedings of the fourth international conference on Artificial intelligence and law August 1993

80%

CAAS is a rule-based expert system, which provides advice on the Victorial Credit Act 1984. It is currently in commercial use, and has been developed in conjunction with a law firm. It uses an object-oriented hybrid reasoning approach. The system was initially prototyped using the expert system shell NExpert Object, and was then converted into the C++ language. In this paper we describe the advantages that this methodology has, for both commercial and research development.

9 The use of meta-rules in rule based legal computer systems ☑ Uri J. Schild , Shai Herzog

80%

Proceedings of the fourth in

Proceedings of the fourth international conference on Artificial intelligence and law August 1993

Rule-Based Systems in the legal domain are often obtained by formalizing legislation. We consider the addition of meta-knowledge in the form of meta-rules to such a system. Such an approach has many advantages both for control and for dealing with the intrinsic vagueness of legal rules. Legal computer systems of different kinds have been proposed and built over the years. In this paper we shall present a legal reasoning system which uses concepts discussed in this paper. The system consists ...

12 Using the semantic web: Agent-based semantic web services
Nicholas Gibbins, Stephen Harris, Nigel Shadbolt
Proceedings of the twelfth international conference on World Wide
Web May 2003

77%

The Web Services world consists of loosely-coupled distributed systems which adapt to ad-hoc changes by the use of service descriptions that enable opportunistic service discovery. At present, these service descriptions are semantically impoverished, being concerned with describing the functional signature of the services rather than characterising their meaning. In the Semantic Web community, the DAML Services effort attempts to rectify this by providing a more expressive way of describing Web ...

d rules and their use in electronic commerce

G. Antoniou, M. Arief

Proceedings of the 2002 ACM symposium on Applied computing March 2002

Business rules are statements which are used to run the activities

of an organization. In the era of electronic commerce it is important for these rules to be represented explicitly, and to be automatically applicable. In this paper we argue that methods from the field of knowledge representation can be used for this purpose. In particular, we propose the use of defeasible reasoning, a simple but efficient reasoning method based on rules and priorities. We motivate the use of defeasible reasonin ...

15 Toward the domestication of microelectronics

ৰি Joel S. Birnbaum

Communications of the ACM November 1985

Volume 28 Issue 11

The great challenge for computer science in this decade is to make computers usable by everyone. Computers, long viewed as a dehumanizing force, will become the most powerful means of personal creative expression and communication ever known.

16 Collaboration and collaborative information technologies: a

77%

d review of the evidence

Helena Karsten

ACM SIGMIS Database March 1999

Volume 30 Issue 2

Collaborative information technologies have been claimed to enhance collaboration in organizations, under certain conditions. This claim was found problematic in several respects, also in the light of the results of 18 case studies of Lotus Notes use, taken from the literature. The cases may be split into three groups: (1) exploratory, conservative, or cautious use; (2) planned and expanding use; and (3) extensive and engaged use of Notes. In the first group, no changes in work arrangements due ...

19 Analyzing due process in the workplace

77%

d Elihu M. Gerson , Susan Leigh Star

ACM Transactions on Information Systems (TOIS) July 1986 Volume 4 Issue 3

Every office is an open system, and the products of office work are the result of decentralized negotiations. Changing patterns of task organization and alliance inevitably give rise to inconsistent knowledge bases and procedures. This implies that there are no globally correct answers to problems addressed by OISs. Rather, systems must deal with multiple competing, possibly irreconcilable, solutions. Articulating alternative solutions is the problem of due process. This pr ...

20 Knowledge acquisition and representation techniques in scholarly 77% communication

Brian R. Gaines , Mildred L. G. Shaw ACM SIGDOC Asterisk Journal of Computer Documentation June 1995 Volume 19 Issue 2

Paper journals, conferences and workshops have been the major media for scholarly discourse for 300 years. However, in the 1990s access to low-cost personal computing and Internet communications is leading to radical changes in the operation of scholarly communities. Electronic publication and conferencing is becoming common in all disciplines using commonly available Internet facilities such as ftp archives, list servers, gopher and world-wide web. Some scholarly communities that had not previo
